

ALPINE®

MAXIMIZE

YOUR PHOSPHATE EFFICIENCY

.....
WITH ALPINE LIQUID FERTILIZERS

Here are the 5 big reasons farmers across Western Canada are switching to ALPINE as their source of Phosphate:

- **SEED-PLACED LIQUID ORTHOPHOSPHATES**
 - No conversion or dissolving required - Immediately available in cold soils
- **NPK ANALYSIS**
 - Proven that added K will enhance uptake of Phosphate - ALPINE is a complete starter package
- **MICRONUTRIENT PACKAGE INCLUDED IN EVERY GALLON**
 - Plant-available micros supplied at germination to ensure availability early
- **CONVENIENT**
 - Air-drill capacity increased - Frees up the air cart for more seed or Nitrogen fertilizer - Low use rate @ 3-4 gals/acre
- **3+ BUSHEL ADVANTAGE OVER DRY PHOSPHATE ON WESTERN CANADIAN TRIALS**
