

ALPINE'S Foliar Nutrition Trial 2010 ... WINTER WHEAT ... *Shaunavon, SK*

Foliar Sprayed:	Flag leaf	Application Method:	Aerial ... 4 gal/A
Variety:	Radiant – 110 lb.	Planted with:	ConsevaPak
Row Width:	12"	Replication:	1

<i>Foliar Treatment</i>	<i>% Protein</i>	<i>Bu/Acre</i>	<i>ALPINE ADVANTAGE</i>
2 L Alpine CRN + Stratego (25-0-0-.5B)	11.4	73.0	+4.5 bu
Check	10.3	68.5	

NOTES:

In-Soil Nutrients:

- 50-20-0-5S – side-banded
- 28-0-0 ... 7 gal. dribble banded mid-April w/Agrotain on both the treated & check plots

OTHER NOTES:

With the Stratego & Alpine CRN applied together, it is hard to tell how much of the yield increase came from the CRN but based on the protein advantage from 10.3% to 11.4%, we can assume some of the increase was from the nutrition.
